

Ready, Steady, GO! In April, we recorded video footage of the cubs racing go karts in the scout hut, then visited the Apple Store in Aberdeen for a field trip where each six created a movie with effects from the footage. The cubs had great fun learning how to use iMovie in iPads, and all left with their work on a USB bracelet.

Stargazers We made the most of the darker nights in Autumn to work on the astronomy badge. The cubs did a night hike up Brimmond hill, and learned how to use star constellations to find North as well as getting an amazing view of the moon! They also enjoyed some 'space food' on a space themed evening and visited the Satrosphere science centre for a show about the adventures of Tim Peake.

We also looked into Remembrance and made our own wreath.

Pioneering all tied up! Baloo took the cubs through learning some simple knots and lashings, this culminated into a take home project to build a self supporting flagpole from some brilliantly crafted kits Baloo had pulled together. Pleased to say that they used their new found skills well, and all were able to compete the task!

First Aid We were lucky enough to get a visit from the local First responders unit, where they learned all about the equipment used, including get a shot of a defibrillator in practice mode, learning the kiss of life, how to tie an effective bandage and finally a chance to be inside a real ambulance!

Into the new year As we headed into 2018, we saw another 3 cubs move up to scouts, and the group was replenished by new cubs moving up from Beavers. We celebrated Chinese new year by making traditional Chinese lanterns, snacked on fortune cookies & found out all about the Chinese Zodiac.
